

Satellite radio is fantastic! I understand that satellite radio is under pressure from the Natjional Association of Broadcasters. Please understand that I adopted satellite radio as soon as it became available because I was very disappointed in commercial radio. Very little variety, too many commercials, and annoying radio "personalities". With satellite radio, I *pay* for the music and information that I want.
Please reject the Natjional Association of Broadcaster's petition 04-160.

Respectfully,

William Tolbert
